

Performa™ Display Fabric

The Industry's Best Fabric Graphics

exhibiting solutions

Performa™ Display Fabric: Better Fabric, Better Graphics!

Exclusive to Skyline! Performa™ is the new high-performance fabric created specifically for Skyline. Its unique design gives Skyline clients the highest quality fabric graphics for exhibits of all sizes.

Performa was designed with a tighter weave and greater density than ordinary exhibit fabrics. Its finer, whiter surface texture and special thread design accentuate colors and give you rich, saturated graphics.

Performa™ provides greater:

- Fit and finish
- Whiteness, brightness
- Color saturation
- Light reflection
- Light blocking
- Stain resistance
- Wrinkle resistance

Best Fit and Finish

Performa's 'equal stretch' design keeps graphics taut for a clean, finished look.

Reduces Hot Spots

Performa diffuses light reducing 'hot spots' that are common when lights are behind fabric.

Stain Resistant, Easy to Clean

Performa fabric repels liquids and can be dry cleaned, spot cleaned or machine washed to keep your graphics in peak show condition.

Flame Retardant

Performa meets or exceeds the minimum requirements of the NFPA 701 small scale test.

Modular Inline Exhibits: Performa™ is compatible with all Skyline modular systems.

Banner Stands: Durable Performa™ keeps you looking great show after show.

Island Exhibits: Performa™ is great for larger-than-life graphics in a variety of island applications like towers and walls. Fabric structures and hanging signs utilize Skyline stretch-knit fabric.
